A HANDS-ON REFERENCE

Claude AI for *Business Owners.*

Everything you need to stop *using* AI and start *building* with it. Keep this open. Refer back often.

10 SECTIONS	30-MINUTE READ	FREE RESOURCE

INSIDE THIS GUIDE

Eleven sections.
One Monday-morning habit.

Read it cover-to-cover, or jump to the section you need. The last page is the one that actually changes your week.

00 What is Claude? The Simple Version
01 The Shift: AI User vs. AI Architect
02 One Prompt vs. a System
03 The 5 Claude Products
04 The Claude Model Family
05 Claude Skills: Built-In and Custom
05c Claude Projects: A Trained Workspace
05d Claude Team: Your Whole Company
05b .md Files vs. Skills
06 The AI-Powered Business Stack
07 8 Old Way vs. New Way Contrasts
08 The 4-Part Prompt Formula
09 Spot. Build. Use. Methodology

JOIN THE WORKBOOK

Scan to answer live, *your responses appear on screen.*

talentmucho.com/events/
claude-for-business/workbook

Open your camera. Point at the QR code. Tap the link. Your answer appears on screen, instantly.

01 Point your camera at the QR code on the left.

02 Tap the link when it appears on your screen.

03 Fill in your answer and it goes live, instantly.

00 · WHAT IS CLAUDE

The simple *version.*

The businesses already winning with AI did not figure it out on their own. Some of you will leave here energized, ride that momentum for two days, and quietly go back to doing everything the old way. Not because you are lazy. Not because you are not smart. Because knowing what to build is not the same as actually building it. *That gap is exactly what tonight closes.*

AI is not here to replace you. It is here to replace the parts of your week that drain you: the emails you dread writing, the social posts you keep putting off, the summaries, the recaps, the formatting, the follow-ups. None of that is why you started your business. Claude handles the repetitive stuff so you can focus on the work only you can do.

WHAT AI WILL *NEVER* REPLACE

Your relationships	The trust your clients have is personal. No AI builds that.
Your judgment	Years of experience, gut instinct, knowing your client.
Your creativity	Your ideas, your vision, your unique way of seeing the world.
Your voice	Claude writes in your style, but the perspective is always yours.
Your story	Why you started, what you stand for, what makes you different.

WHAT AI HANDLES FOR YOU

- The first draft of every email
- Formatting reports and recaps
- Researching answers you need fast
- Writing social captions in bulk
- Summarizing long documents
- Turning rough notes into clean copy

01 · THE FOUNDATION

Stop being an AI User. *Start being an AI Architect.*

Most people get faster at the same work and call it progress. Architects do something different. They remove the work entirely. The shift is small in theory, enormous in practice.

OLD WAY · AI USER

- Open Claude. Type a prompt. Wait.
- Copy, paste, tweak, start over.
- Same work, just done a little faster.
- Nothing happens unless you press go.
- The moment you stop, the work stops.

NEW WAY · AI ARCHITECT

- Notice the work that repeats every week.
- Design a system that handles it for you.
- Train it once, refine it until it's right.
- The task quietly leaves your calendar.
- It runs whether you're there or not.

THE SHIFT *Stop being faster at the same work. Start owning the system that does it for you.*

---

02 · THE METAPHOR

The Prompt vs. *The System.*

Stop buying gumballs one quarter at a time. *Build the factory.*

BEFORE · ONE PROMPT, ONE OUTPUT

- You trigger it manually every time.
- Stops when you stop.
- Same effort, every single week.

AFTER · BUILT ONCE, RUNS FOREVER

- Train it once.
- No manual trigger. No waiting.
- Runs while you sleep.

THE SHIFT *From transactional prompts to trained, owned systems.*

---

03 · THE PRODUCTS

Five ways *into Claude.*

One platform. Five ways in. Tonight you use the first one.

01 Claude Chat

TONIGHT'S TOOL

The main interface at claude.ai. Web and mobile. Upload files, set Projects, use Skills, search the web. Free to start.

02 Claude Code

CLI and desktop for writing, reviewing, and editing code. Reads entire codebases. Supports Skills. For your dev team.

03 Claude Cowork

Desktop app for Mac and Windows. Multi-step file tasks, document workflows, chained automation. No code needed.

04 Claude for Chrome

Chrome extension. Claude controls your browser: browses sites, fills forms, extracts data, runs web tasks as an agent.

05 Claude Design

NEW · APR 2026

Visual workspace. Describe an idea, Claude builds it: prototypes, slides, one-pagers, ads. Powered by Opus 4.7. Export to PDF, PPTX, Canva.

04 · THE MODEL FAMILY

The four-level *model spectrum.*

Same platform at the top and bottom. Completely different power.

I

Haiku 4.5 · The Fast One

Quick tasks, summaries, short replies, formatting, high-volume work. Best for speed.

II

Sonnet 4.6 · The Everyday One

TONIGHT'S MODEL

Smart, efficient, fast enough for daily work. Writing, analysis, planning, most business tasks. Start here.

III

Opus 4.6 · The Powerful One

Complex, high-stakes work. 1-million-token context window. Deep analysis, long documents, nuanced strategy.

IV

Opus 4.7 · The Newest One

Vision improvements, higher image resolution. Powers Claude Design. Better at complex coding tasks.

WHERE TO START

Start with Sonnet 4.6. It handles 90% of what a business owner needs. Upgrade to Opus when the task is genuinely complex.

05 · CLAUDE SKILLS

Your specialist *team.*

Modular capabilities you install once. Claude loads them automatically when a task matches.

BUILT-IN SKILLS · FREE · ALL USERS · AUTO-TRIGGER	
Excel Skill	Create spreadsheets with charts, formulas, and structured data from a single conversation.
Word Skill	Produce formatted documents, reports, and letters with proper layout and structure.
PowerPoint Skill	Build complete slide decks from an outline: slides, speaker notes, all of it.
PDF Skill	Fill PDF forms, combine files, create polished PDFs from raw content.

CUSTOM SKILLS · UPLOAD VIA SETTINGS > FEATURES	
Brand Voice Skill	Your tone, adjectives, and audience applied to every piece of content automatically.
Email Templates Skill	Your client email formats used every time you write. No re-explaining your style.
Meeting Notes Skill	Your company's exact format for structuring notes, action items, follow-ups.
Weekly Newsletter Skill	Your 4-part newsletter system, pre-loaded and ready every Monday morning.
Follow-Up Email Skill	Your client follow-up sequence for prospects who went quiet after a discovery call.

THE DIFFERENCE

A prompt is something you do once. A Skill is something you build once and use every week.

05C · CLAUDE PROJECTS

A trained workspace *for one job.*

Think of a Project as a dedicated room inside Claude. You bring in your files, instructions, and tone of voice once, and every conversation that happens in that room remembers all of it.

WHAT IT IS

A persistent workspace that combines three things in one place:

- Your custom instructions (how Claude should behave)
- Your knowledge files (.md, PDFs, docs Claude can reference)
- Your conversation history (everything stays in context)

A Project = the trained version of Claude that handles one specific job.

WHY IT MATTERS

Without Projects, you re-explain yourself every single chat. With a Project, you teach Claude once. After that:

- It already knows your brand voice
- It already has your client list, your offers, your SOPs
- Every output stays consistent, every time

Stop training Claude from scratch every Monday morning.

WHEN TO USE IT

Anytime a task repeats. One Project for newsletters. One for client follow-ups. One for social. Each one trained once, used forever.

05D · CLAUDE TEAM

Your whole company *on the same Claude.*

Claude Team is the shared plan for businesses. Everyone on your team logs in to the same workspace, with the same Projects, Skills, and brand context already loaded.

WHAT IT IS

A multi-seat plan ($30 per user / month, 5-seat minimum) with:

- Shared Projects across the whole team
- Higher usage limits than the personal plans
- Central billing and admin controls
- Privacy: your data is never used to train models

Team = one Claude, many people, all on the same page.

WHY IT MATTERS

Once one person on your team builds a great Project, the whole team uses it. No more:

- Five versions of the same brand voice doc floating around
- VAs guessing how you write emails
- Knowledge stuck in one founder's head

Build once. Your team uses it forever.

WHEN TO USE IT

The moment a second person needs to write in your voice: a VA, a contractor, a partner. That's when Team pays for itself in a single week.

05B · KNOWLEDGE VS. CAPABILITY

.md Files vs. *Skills.*

Know the difference. Both matter. Each one does a different job.

.MD FILES · MARKDOWN

Think of these as instructions or reference documents you leave on Claude's desk. Claude reads them as background knowledge before it starts working.

USE THEM TO STORE

- SOPs and workflows
- Writing style guides
- Client information
- Brand context and tone rules

.md = knowledge Claude should remember.

SKILLS · PACKAGED CAPABILITIES

Think of these as reusable mini-tools or behavior modules. A Skill is a packaged capability Claude actively applies when a task matches it. *Not just reads: does.*

THEY CAN INCLUDE

- Structured instructions
- Step-by-step actions
- Templates to follow
- Logic, conditions, output formats

Skill = a packaged capability Claude actively applies.

THEY WORK TOGETHER

Use .md files to teach Claude who you are and how you work. Use Skills to give Claude a repeatable job it can run on demand.

---

06 · THE STACK

The AI-powered *business.*

Four layers. Each one supports the next.

IV	**AI Business Brain** The full memory of your business, kept inside Claude. Your offers, your case studies, your customers, your tone, your pricing, the objections you hear every week. The longer it lives there, the smarter your output becomes.
III	**AI Skills and Employees** Trained Claude Projects that already know your voice, your ideal client, and your process. Hooked into the rest of your stack through Cowork or Claude Code. They draft the follow-up, push it to your CRM, and format the report while you sleep.
II	**AI Architect** The version of you that notices repeating work, writes the prompt, saves the Skill, and loads it into a Project. From this layer up, you stop pulling the trigger. The system pulls it for you.
I	**AI-Committed Founder** You. The person who looked at the old way and decided it wasn't going to work anymore. Tonight is where that decision gets made. Every layer above this one rests on it.

07 · THE CONTRASTS

8 old way vs. *new way.*

Pulled from the demos inside tonight's session.

WHAT	OLD WAY	NEW WAY
WEEKLY NEWSLETTER	3 hrs, blank page, dreading Sunday night	30 min, in your voice, saved system
CLIENT FOLLOW-UP EMAIL	Drafts folder full of emails never sent	60 sec, sounds exactly like you
GENERIC AI OUTPUT	"In today's fast-paced environment..."	Sounds exactly like you. Every time.
BUSINESS DESCRIPTION	You go quiet when someone asks at dinner	3-sentence paragraph. Nails it.
MONDAY MORNING PLANNING	Open email, get reactive, lose the morning	Open the file. Fill Part 4. Done in 5 min.
SOCIAL CONTENT BATCH	3 hrs per week, often skipped entirely	30 min, 5 posts, scheduled and done
OFFER DESCRIPTION	Every version sounds like a different person	One paragraph. Consistent. Converts.
"I'M NOT TECHNICAL"	Hard barrier. You never start.	Zero code. You describe it. Claude builds it.

08 · THE METHOD

Context. Task. *Format. Input.*

Four parts. Repeatable across every task, every week, every business.

I

Context · The Brain

Who you are, who you serve, how you sound. Your Brand Voice Quick-Start. Load it once as your first message. It powers every output that follows. Most people skip this and wonder why Claude sounds generic.

II

Task · The Job

The specific thing you want Claude to produce. Be concrete. Specificity is the entire skill. "Draft a follow-up email to a prospect who went quiet after a discovery call last week" beats "help me with my email."

III

Format · The Constraints

Claude follows format instructions precisely. Use them every time. "Under 150 words. No corporate opener. Three short paragraphs. Do not use the word leverage."

IV

Input · The Only Part That Changes

The topic, the client's name, the specific situation this week. Parts I through III stay exactly the same every time. Only Part IV changes. Build the system once. Open it every Monday. Fill in Part IV. Done.

BEFORE YOU AUTOMATE

You cannot automate a process that does not exist. Build it manually once. Refine it until it is right. Then save it as a Skill.

09 · THE METHODOLOGY

Spot. Build. *Use.*

The habit that separates AI Users from AI Architects. The people who get the most from Claude open it before they open their email. The formula is in your hand. One task. This week.

01 **Before you open your email**
Open the file you saved tonight. This comes first, every time.

02 **Paste it into Claude**
Load your Context, Task, and Format. Parts I, II, and III are already written.

03 **Fill in Part IV**
The only part that changes this week: the topic, the client, the situation.

04 **Done.**
That is the habit. That is the whole system.
